CSC 351 Lab Sheet – Lab 1

Hand in at start of class Wednesday January 21

Name_____

1. List the languages for the programs you ran in lab 1. For each language state the following. Attach extra pages if needed, MUST be stapled to this with this page on top.

    - whether it is interpreted, compiled, or hybrid
    - how you interacted with the language (compiler, interpreter, etc.)
    - whether the language has an interactive shell
    - whether you have used the language before
    - ONE feature of syntax in the program written in that language that is DIFFERENT from what you have seen before, or if NOTHING is different, one interesting feature of syntax with a brief statement of why it is interesting.
    - Approximate YEAR when this language appeared (for multiple versions, e.g. Fortran, state the year for the FIRST version as well as for the version of the compiler you used.
